

Gmail Setup Guide Before Running the C# Backup Tool

1. Enable IMAP in Gmail

- 1 Open Gmail in a browser
- 2 Click the gear icon and select 'See all settings'
- 3 Go to 'Forwarding and POP/IMAP'
- 4 Under IMAP access, select 'Enable IMAP'
- 5 Click 'Save Changes'

Use the following IMAP settings:

```
IMAP server: imap.gmail.com
Port: 993
Security: SSL/TLS
Username: your full Gmail address
Password: Gmail App Password
```

2. Enable 2-Step Verification

- 1 Go to your Google Account
- 2 Open 'Security'
- 3 Select '2-Step Verification'
- 4 Follow the setup process until fully enabled

3. Create an App Password

- 1 Go to your Google Account
- 2 Open 'Security'
- 3 Select 'App passwords'
- 4 Sign in again if prompted
- 5 Generate a new app password
- 6 Copy the 16-character password

Use this App Password instead of your regular Gmail password.

```
Example:
Gmail address: yourname@gmail.com
App password: abcd efgh ijkl mnop
```

4. Verify Setup

- 1 You can log into Gmail normally
- 2 IMAP is enabled
- 3 2-Step Verification is active
- 4 You generated an App Password
- 5 You will not use your regular password

5. Run the Backup Tool

```
dotnet run
```

```
Gmail address: yourname@gmail.com
```

```
App password: your 16-character app password
```
